

Written Comments Received at Information Session – October 1, Marble Hall

I love Lakeshore Park. We walk as often as we can. Grandchildren played sports here. Son and daughter-in-law walk daily. I wish that there were places for fishing. To make use of the riverfront.

In athletics zone physical health – please save the circle of pines above the KUB transfer station – if at all possible. It's a special quiet spot to stand in center. Great place for hammocks. It is home to a lot of birds including the brown headed nut hatch. We feel very fortunate to live nearby and walk or Birdwatch several times a week. We love all the improvements thank you all.

Is it possible for the park to donate or designate a place for volunteer musicians to play and record live shows for the nursing homes and shut-ins throughout the City.

As an event promoter and founder of Lake Shores first festival, I would like to make sure that all of that lawns have access to power and if possible water. This would relieve cost for events and make them safer and cleaner without generators.

I like that it unifies the park. I like the use of the topography. I dislike that there is not enough of a connection to the river.

Thank you for your vision, your leadership, and your stewardship of the signature landscape in our community. I am hopeful that the robust interest and enhancing river access that your survey can be satisfied through future collaboration and discussion with the Tennessee River line.

I love the old trees. They are jewels! Thanks for preserving the old trees.

Am concerned about past presentations on lighting that are different now than presented. Concerned about proximity of the Pergola, lions view Terrace in the event field and band shell to residences to the north. Will there be limits on hours of operation for events at the event field band shell and Pergola?

Trail near river/sewage plant needs to be moved up to remove the roots they are dangerous. More trash cans along walking trails. Better lighting. Wonderful park, so lucky to have it. Emergency help Dash blue light police request stations. More restrooms. Drink machines with water and Gatorade.

Please put a bench on the top North Shore hill behind the old hospital next to the road.
